ADVANTAGEHEALTH CORPORATION CHOSEN TO BE EXCLUSIVE PREFERREDONE PROVIDER OF WORKSITE HEALTH PROMOTION AND BIOMETRIC SCREENING SERVICES

Bloomington, MN – May, 2007. AdvantageHealth is proud to announce that it was chosen by PreferredOne to be their exclusive provider of health promotion and biometric screening services. “PreferredOne was looking for a flexible, best-in-class vendor to supply key health promotion services to their clients,” stated Kristine Keykal, Co-founder of AdvantageHealth. “We are pleased to be that provider and view partnerships like this as a core business strategy necessary to achieving our mutual goals.” Services provided by AdvantageHealth for PreferredOne clients will include Health Risk Assessments, biometric screenings (cholesterol/glucose, body composition, body mass index and blood pressure) and lifestyle coaching.

In wanting to increase the quality and availability of their onsite health promotion, health improvement and wellness services to their clients, PreferredOne’s goal was to unite with a health promotion provider that has a proven track record of success within the health field. “We found AdvantageHealth to have the tools necessary to move PreferredOne in the right direction within health promotion and we’re already experiencing a successful partnership,” said Dr. John Frederick / PreferredOne Chief Medical Officer.

About PreferredOne

PreferredOne has been setting the standard for quality health care and service for nearly twenty-five years. PreferredOne is big on essential services, the services that make a positive difference in administering health care benefits through tailored planning, flexible options, superior customer service and applied technology.

Over 325 employees in one location in Golden Valley, Minnesota, administer coverage to more than 8,000 employer groups with over half a million members through networks providing access to more than 12,700 physicians (6,300 primary care and 6,400 specialists), 240 plus hospitals and numerous pharmacy benefit management providers, reinsurers and national/regional PPO networks.
